About RAMS

RAMS is a fully digital rack management software, where you can monitor the safety of your racks anytime, anywhere. It provides you with a real-time tracking and monitoring portal for your pallet racking inspections, damage or repairs, and optimizes the overall safety of your warehouse easily and efficiently.

It gives you the control, visibility, reporting and traceability you need to keep your warehouse safe.

RAMS provides you with the whole sight of your warehouse estate, enabling you to save time, and cost and improve rack safety. Leveraging real-time information from a central cloud interface makes RAMS a truly revolutionary portal to manage your warehouses.

Key Features

Maximize your warehouse operations efficiency, reduce maintenance costs, and increase employee safety with the RAMS platform.

01 | **Digitize Your Warehouse**

Get rid of the paperwork and all its hassle. RAMS allows you to digitize your pallet racking system.

02 | **Expert Third Party Inspection**

Invite certified experts to your warehouse to examine the internal audits and conduct an external inspection.

03 | **Real Time Impact Detection**

Get a prompt notification if any part of your rack system has been damaged by an external impact.

04 | **Tracking**

Track down the issue to its exact location along to analyse and rectify the issue at the earliest.

05 | **Rack Health**

The severity of the Rack Health is reflected by color codes. This is calculated in considering the issues detected during the inspection.

06 | **Multiple Warehouse**

The RAMS system makes it easy to manage both single-site as well as multi-site warehouses infrastructure.

07 | **Automated Reports**

RAMS provides real-time reports to make sure your warehouse racking is in compliance and to maintain maximum safety.

08 | **Cost Savings**

Potential for a significant reduction in maintenance costs of your racking infrastructure.

We Provide Solutions

Upgraded Safety

With our software, you can easily monitor and analyze the condition of your racks, identify potential problems before they occur, and schedule maintenance and repairs at the most convenient time. This means that you can keep your operations running smoothly, while ensuring that your inventory and employees are protected.

Digitize Your Inspections

RAMS offers a comprehensive pallet racking safety management tool that allows you to digitize inspections. With this tool, you can easily schedule and conduct inspections, track progress, and generate detailed reports. Whether you're working online or offline, our tool provides you with real-time data, allowing you to make informed decisions about your racking system.

Impact Detection

RAMS also offers impact detection capabilities which allows you to track and monitor impacts on your pallet rack system in real-time, providing you with a detailed analysis of the location and the reason behind a recurring issue. With this information, you can take prompt action to address any issues, and prevent damage to your inventory and injury to your employees.

Complete Control

RAMS gives you full control over your warehouse racking from inspections to repairs. With this powerful tool, you can easily schedule and manage racking inspections, monitor the condition of your racks in real-time, ensuring that your racking system is always in top condition and compliant with industry regulations.

Risk Prediction

The software tracks and monitors the damage of your rack system, providing you with an accurate view of the condition of your racks. This information can help you anticipate potential hazards beforehand, allowing you to take necessary measures.

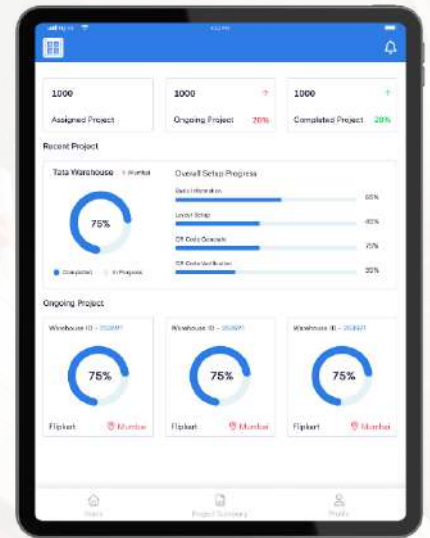

Inspection Tracking

RAMS provides the necessary solution for ensuring that your rack system is regularly inspected by the respective authority, and it also keeps all records of inspections and their results.

RAMS Overview

Warehouse Setup Tool

We offer the most interactive dashboard, giving you access to the captain's cabin from where you can manage several rack setups simultaneously while keeping an eye on project progress and real-time analysis of your rack setup data. You can also create and assign tasks, set deadlines, and monitor progress on each project. Our real-time progress tracking feature ensures that you always have an up-to-date view of what's happening in your warehouse.

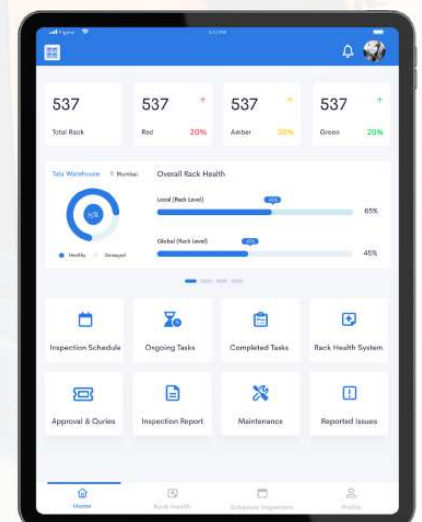

Warehouse Management

With regards to the detected issues with your pallet rack system the software analyzes the real-time rack health. It further represents this information in an interactive dashboard, providing you with a clear and concise view of the current state of your racking system. It also includes advanced capabilities that allow you to predict the risk of potential problems.

Pallet Rack Inspection

This is most interactive dashboard, which gives the inspector the access to manage the workload along with the progress of the ongoing inspection. The inspector can also access multi tasks and inspections simultaneously. This inspection portal allows inspectors to check the health of the pallet rack systems in real-time and receive timely updates on any issues that need attention.

Partner Program

Become A Warehouse Third Party Expert With - RAMS

By partnering with RAMS, you have the opportunity to reach new customers, boost your revenue, and dominate the Pallet Racking Inspection Services market.
